FLUOROSCOPY

- Esophagram
- Upper GI (incl. KUB)
- Small Bowel Study
- Barium Enema Double Contrast

EXAM PREPS

CT

CT EXAMS with IV CONTRAST	No solid food 2 hours prior to exam.
CT ABDOMEN and/or PELVIS	You may be asked to drink a liquid (called oral contrast) that will coat the lining of your GI tract and help evaluate your condition. If so instructed, drink one bottle 4 hours before the examination (or the night before) and a second bottle one hour before the examination.
CORONARY CTA	No solid food 2 hours prior to exam. Additional preparation will be done @ Inverness Medical Imaging. Oral medication may be needed one hour prior to exam to slow down the heart rate.

MRI

ALL MRI EXAMS	Wear comfortable clothing. No metal and no eye makeup. Please let us know if you have a pacemaker or if you have a brain aneurysm clip or any METAL in your body.
---------------	---

ULTRASOUND

ALL ABDOMINAL US EXAMS	Nothing to eat or drink 6 hours before exam.
PELVIS US EXAM OB (early pregnancy) US EXAM	Drink 4 cups (32 ounces) of liquid (water, tea, coffee etc.) 1 hour prior to exam. Do not void. The bladder needs to be extremely full for a good quality examination.

X-RAY PROCEDURES

UPPER GI and/or SMALL BOWEL STUDY	Nothing to eat or drink after midnight.
BARIUM ENEMA	Pick up LoSo preparation at least 24 hours prior to examination from Inverness Medical Imaging and follow instructions.

DEXA

ALL DEXA EXAMS	No calcium supplements or osteoporosis medication 24 hours prior to exam. No barium, nuclear medicine or IV contrast exams within 7 days prior to examination.
----------------	---

**Unless instructed to the contrary, you may take your usual prescription medications the day of the exam with liquid.
If you have any questions contact your physician or IMI at 352-637-6100.**
